CARE HOME BED STATE CAPACITY TRACKER

Your community Your care
Developing Buckinghamshire together

1. INTRODUCTION

To reduce care home bed vacancies and the time it takes to place service users, we are introducing a tool that allows you to share your bed availability with Buckinghamshire Placement Teams and Brokerage Services. You will only be able to see your bed availability whilst Placement Teams and Brokerage Services will see all available beds in Buckinghamshire.

We want to better manage the use of our care home beds rather than having them lie vacant and unused especially when there is demand. We have worked with our partner, Graphnet, to develop an IT solution called Care Centric. Care Centric is a free tool that allows you to share your bed availability with Placement Teams and Brokerage Services and provides easy access and visibility of the available beds in real time.

2. THE BENEFITS

CARE HOMES

- Enables you to advertise your available beds quickly and easily
- Saves staff time answering phone calls regarding availability of beds
- Saves staff time by removing the need for emailing lists of available beds
- Reduces empty beds

PLACEMENT TEAMS/BROKERAGES SERVICES/ CLIENTS

- Reduces time taken to find a care home
- Cuts down the time spent phoning around care homes
- Service users spend less time waiting for a bed that will meet their needs

3. FEATURES

- The tool is web based so can be accessed easily, you just need an Internet connection
- Works with most Web Browsers i.e. Internet Explorer, Firefox, Google Chrome, Microsoft Edge
- Simple to register and easy to use
- Free to use and secure
- Provides a view of available care home beds across Buckinghamshire
